BDCP joint fact sheet 1-18-10.pdf

Tom - Attached is a new fact sheet from nrdc, edf, tbi, Am Rivers and Defenders outlining high priority concerns re the bdcP process. This is not intended as a comprehensive list, but rather represents the most high priority and foundational issues. I'm in DC and will talk with DOI, House and Senate offices. Let's compare notes when I return.

I also told my colleague Nancy Stoner, who is headed to headquarters that you would be a good resource if she has questions. In addition to helping david hayes straighten out bdcP, my key recommendation was that EPA should help the State Board during the public trust flows determination process, just as you did with the Accord.

Barry

P.s. Ignore the below, unless you can explain why my computer has stopped converting word docs to pdfs.

To convert to PDF you either have to save it as a PDF or print to PDF. I have Office 2007 as of last week so I'm not sure how your word will do it. But under the "File" menu there might be a "publish to pdf" option. Otherwise you can try "save as" and save it as a PDF file type. Or if your computer is attached to a Adobe printer that's another way to get a PDF.

I have forgotten how to convert Word to PDF. And the Word help site is remarkably not helpful here. Can you remind me?
